

Evan Williamson

Software Developer based in Dallas, Texas

+1 210 612 8254 | Dallas,Tx | [linkedin.com/in/evanwcodes/](https://www.linkedin.com/in/evanwcodes/) | My Website | github.com/evanwilliamson94

Introduction

Software developer for 5 years with experience in front-end development, specializing in various modern web technologies, check out my portfolio for more of my work!

Technical Skills

Main Technologies: HTML, CSS, JavaScript, React, Tailwind CSS, NextJS, TypeScript, Firebase, Redux, API Integration, Data Structures and Algorithms.

Frameworks: MaterialUI, Tailwindcss, Firebase, React Native, React, NextJS, Redux, Framer Motion, Styled Components, React Query, Preact, Jest and Cypress, GitHub

Professional Experience

Ultraverse NFT WORLD [Website](#)

Software Developer Intern

- Developed and integrated various features such as Hot Collections, New Items, Top Sellers, Author Page, and Item Details
- Implemented animations, countdowns, and carousels, enhancing user engagement and experience.
- Implemented new features for the student management system, enhancing over 500 students' experience.
- Utilized APIs to fetch real-time data for different sections.
- Managed the project using GitHub, creating separate branches for each feature and collaborating with the team.

Dallas, Texas, | 2024 (May) – 2024 (June)

Patch To Life

Founder & Lead Developer | Sold Company

Remote | 2019 - 2023

- Founded and led an e-commerce, product based business, developing and maintaining the website using HTML5, CSS, JavaScript.
- Implemented a robust front-end architecture to ensure a seamless user experience.
- Utilized Firebase for backend services, including user authentication and real-time database management.
- Integrated SEO best practices to enhance search engine visibility and drive organic traffic.
- Implemented backend monitoring for UI uptime with email alerts, enhancing customer support response.
- Developed dynamic carousels and countdowns to market products effectively, especially for mobile devices.
- Successfully scaled the business, resulting in a profitable exit.

Dallas, Tx | 2019 (Sept) – 2023(Oct)

Projects (personal)

Twitter-Clone: [Link to Project](#)

Full Stack Developer

- **Full-Stack Development:** Independently developed a fully functional Twitter clone, replicating key features of Twitter.
- **User Authentication:** Implemented secure user authentication using Firebase Authentication, allowing users to register and log in.
- **Real-Time Database:** Utilized Firebase Firestore for real-time database updates, ensuring instant reflection of changes such as new tweets, likes, and retweets.
- **User Interaction Features:** Built features like liking, retweeting, and commenting on tweets to enhance user engagement.
- **Responsive Design:** Ensured a responsive design using Tailwind CSS, providing compatibility across various devices and screen sizes.
- **Dynamic Content:** Developed features such as live tweet updates, notifications, and user feeds dynamically.
- **State Management:** Leveraged Redux for efficient state management and improved application performance.
- **API Integration:** Integrated APIs for fetching and displaying real-time data.
- **UI/UX Enhancements:** Focused on user experience by incorporating smooth animations and transitions using modern React libraries.
- **Mobile Optimization:** Ensured the application is fully optimized for mobile users with a focus on seamless navigation and performance.

Technologies Used: HTML5, CSS, JavaScript, React, Redux, Firebase, Tailwind CSS

Portfolio: Created my portfolio as part of contract work initially but currently use it as my own, utilizing framer motion, BEM CSS conventions & react to create an animated and engaging portfolio.

Education:

FES Institute of Technology | [Website](#) | [Certificate](#)

Graduated July 2024

Web Application Development/Front-end Development

Dallas, Texas

- Classes: HTML, CSS, JavaScript, React, TypeScript, Backend Development, Data Structures & Algorithms, NextJS, Redux, Firebase, Tailwind CSS, NextJS 14.

Harvard University

March 2024

Introduction to Computer Science, EDX

Cambridge, MA

- A broad and robust understanding of computer science and programming
- How to think algorithmically and solve programming problems efficiently
- Concepts like abstraction, algorithms, data structures, encapsulation, resource management, security, software engineering, and web development
- Familiarity in a number of languages, including C, Python, SQL, and JavaScript plus CSS and HTML
- How to engage with a vibrant community of like-minded learners from all levels of experience
- How to develop and present a final programming project to your peers

Bachelor of Marketplace Leadership, CFNi, Dallas, Texas.

From 2014-2019

Advance Study Diploma, CFNi, Dallas, Texas 2018

Other

Interests: Coding, traveling, hiking, networking, seminars, cinematography, and acting.
