Introduction

Innovative full-stack software developer with 6+ years of experience building scalable, user-focused applications that drive business growth and enhance digital experiences. Renowned for spearheading impactful projects like SoberSocial, a groundbreaking social media platform fostering sober living communities. Known for combining cutting-edge technical expertise with a creative mindset honed through producing and was the cinematographer for a feature film streamed over 5 million times. Adept at translating complex ideas into elegant, user-friendly solutions, while leveraging a substantial social media following of 600,000+ to promote meaningful initiatives.

Technical Skills

Main Technologies: HTML, CSS, JavaScript, React, Tailwind CSS, Next.js, TypeScript, Firebase, Redux, API Integration, AWS S3, Clerk, NeonDB, Drizzle ORM, Docker, CI/CD

Frameworks & Tools: Material-UI, React Native, Framer Motion, Styled Components, React Query, Jest, Cypress, Postman, Figma, GitHub Actions, Vercel

Creative Tools: Adobe Premiere Pro, Final Cut Pro, DaVinci Resolve, Photoshop

Professional Experience

SoberSocial

Founder & Lead Developer

Remote | August 2024– current

- **Designed Core Systems:** Built scalable, full-stack features including user authentication, real-time data synchronization, and profile management using Clerk and NeonDB.
- **Launched Social Features:** Developed dynamic community features like photo uploads, likes, and comments, integrating AWS S3 and serverless APIs. Sobriety and financial tracking too.
- **Enhanced Usability:** Delivered an intuitive, responsive interface with Tailwind CSS and Framer Motion, significantly improving user engagement.
- **Impact:** Secured over 100 active users in the first month, paving the way for a projected \$115,000 annual revenue.

Ultraverse NFT WORLD Website

Software Developer Intern

Dallas, Texas | 2024 (May – June)

- Boosted user engagement with curated content features such as Hot Collections and New Items.
- Implemented real-time data integration and interactive animations for a seamless user experience.
- Coordinated with cross-functional teams using GitHub to streamline feature development.

Patch To Life

Founder & Lead Developer | Sold Company

Remote | 2019 - 2023

- Designed and developed a high-performing e-commerce website using HTML, CSS, and JavaScript, ensuring a seamless and intuitive user experience.
- Implemented SEO best practices to optimize search engine visibility, driving nationwide traffic and consistent sales growth.
- Built a Firebase-powered backend for efficient order processing and real-time data management.
- Created and executed email marketing campaigns using JavaScript to engage customers and drive repeat sales.
- Single-handedly managed product design, branding, and marketing, resulting in the successful sale of the business to a holistic company in Costa Rica.
- Delivered an exceptional UI and UX, providing customers with a streamlined and visually appealing online shopping experience for transdermal vitamin patches.

Projects (personal)

SoberSocial

- **Technologies Used:** TypeScript, Next.js, Tailwind CSS, Clerk, NeonDB, AWS S3
- **Description:** A billion-dollar standard social media app for sober living communities. Features include:
 - Real-time sobriety tracking and financial progress.
 - Community-driven posts with image uploads, likes, and comments.
 - Personalized onboarding with data syncing to NeonDB.
 - Responsive design for seamless mobile and desktop experiences.

Twitter-Clone ([link to project](#))

- **Technologies Used:** React, Redux, Firebase, Tailwind CSS
- Replicated Twitter's core features: tweeting, liking, retweeting, and real-time updates.
- Focused on security and performance with Firebase Authentication and Firestore.

Portfolio Website

- Developed a visually engaging and animated portfolio using React and Framer Motion.
- Applied BEM CSS conventions for maintainable and scalable styles.

Education:

FES Institute of Technology

Certificate in Web Application Development | Dallas, Texas | Graduated July 2024

Relevant Courses: React, TypeScript, Backend Development, Data Structures & Algorithms, Next.js, Redux, Firebase

Harvard University (EDX)

Introduction to Computer Science | Cambridge, MA | March 2024

- Covered abstraction, algorithms, data structures, software engineering, and web development.
- Developed a strong foundation in C by creating small games, enhancing understanding of binary systems and theoretical computer science concepts.

CFNi, Dallas, Texas

Bachelor of Marketplace Leadership | 2014 – 2019

Advanced Study Diploma | 2018
